

AVAILABLE ACCESSORIES: BM175-10PT

SEQUENTIAL EXTENSION CABLES

EC15-10

- Weight: 1 lb. (0.5 kg.)
- Connects the blasting machine to the TB15 terminal board.

EC15AW-250

- Weight: 17 lbs. (7.7 kg.)
- Connects the blasting machine to the TB15 terminal board.

EC15AW-500

- Weight: 32 lbs. (14.5 kg.)
- Connects the blasting machine to the TB15 terminal board.

TB15 TERMINAL BOARD

- Shipping Weight: 5 lbs. (2.3 kg.)

TB15 Terminal Board is a compact, durable, rugged, lightweight printed circuit design with 10 pairs of hookup terminals for up to 10 circuits. A socket is provided for connecting extension cables. The AD5 Load Plug provides the shunting requirement during connection of the detonators to the terminal board. In addition, the terminal board provides convenient Load Plug storage.

AD5 LOAD PLUG

- Shipping Weight: 1 lb. (0.5 kg.)

AD5 (BM175 series) Load Plug is used to test blasting machines. The load plug contains 10 resistors, each equal to the maximum load resistance of the blasting machine.

AD20 SHORTING PLUG

- Shipping Weight: 1 lb. (0.5 kg.)

AD20 (BM175 series) Shorting Plug/Socket for Sequential system.

ET175-10 ENERGY TESTER

See additional spec sheet for details regarding this energy tester designed specifically for the BM175-10PT Sequential Blasting Machine
